# Portadent T

The portable patient chair for the mobile dental treatment unit.

- ◆ This patient chair is to be used in connection with a transportable operatory unit, preferably SIROBOY T of Siemens, for the dental treatment in remote regions and all over there, where stationary equipment cannot be installed.
- ◆ Height adjustment of seat by means of a gaspring with scissor-type jack.
- ◆ Synchronous seat inclination and backrest adjustment by gaspring.
- ◆ The headrest with head wedge is progressively adjustable and fixable.
- ◆ The one-piece upholstery is fixed with Velcro fastener.
- ◆ Extendible studs and a jackscrew guarantee stable stand of the chair.
- ◆ A stainless steel cuspidor with waste tank and halogen-OP-light can be additionally installed (adapter necessary).
- ◆ For transportation, fold the chair simply together and put it with cuspidor and halogen lamp in an aluminium transport box.
